

AS 40/25

Main Features

- Same size as ARRISUN 40/25 but over 3 kg lighter
- Compensation for Cable Loss (CCL)
- Tubular steel yoke
- Two disk brakes with steel handle
- Cross Cooling allows safe operation at extreme tilt angles
- Weather resistant IP23 rating

The new AS 40/25 is an improved replacement for the seasoned ARRISUN 40/25. It uses the same housing as the new M40/25 and is thus of the same size, but over 3 kg lighter than the current ARRISUN 40/25. Since the accessory diameter has stayed the same, all existing lenses, barndoors and scrims can be reused.

CCL

The lamphead is equipped with a CCL module (compensation for cable loss). When operated with the new ARRI EB 2.5/4 kW with CCL, full power is maintained all the way to the lamp even when very long cables are used. This means uniformly high light output independent from cable length.

Steel yoke with two disc brakes

In order to hold even the heaviest accessories safely in place, the AS40/25 sports a tubular steel yoke and two disc brakes. A single, robust steel handle allows one-hand operation for tilting.

Cross Cooling

Like all TRUE BLUE ARRI lampheads, the AS40/25 implements cross cooling and allows thus safe operation even at extreme tilt angles. The electronics housing is spaced apart from the actual lamp housing to keep temperatures down and prolong the lifetime of electronic components. It is easy to open and to maintain.

IP 23

For outdoor use the AS40/25's IP23-rated weather resistance withstands even driven rain.
